We have come to the end of another E-Skip DX season, and should be into the Tropics DX about now, when the winter sets in on us this will bring a lull in our DX activities thus the reports to our Editors drop off. We want to have material to put into the issues of these bulletins so please keep in touch with your Editor - Let him know what's going on, etc...even if you let

him know how the Mother-in-law is coming along. Try to support his column, surely there are many who can pass on news to him that can be of interest to your fellow member.

There are many AIPA'ers now in the FM-DX field. The reports show some very good reception in that form of DX. Jim Hughes of WSWM in East Lansing, Mich. suggests writing these stations, and especially to him if any of our members pick up unusual reception from his station.

B.J. Bingham tells us of a visit he had from our Buffalo member, Don Voegeler--He dropped in from Missile Base in New Mexico enroute to Buffalo.

We have several inquiries as to the whereabouts of Tom Hidley ? What's happened, and where are you Tom ?? Jim Dillon of Regina, Sask. Canada will be going to school in Toronto, Canada....We will pass on his address when available. Bill Meers of La Grange, Ky. will be in southern France by this time ...Institute for American Universities 21, rue Gaston-de-Saporta Aix-en-Provence, France.

Welcome New Member- A.D. Vanatta 822 Ramona Ave. Modesto, Calif.

Re-Newals --- David Swanson, Chicago, Ill. (Says he glad to send 3 similiars
Bill Grant, Worcester, Mass. --- Been in a long time.
Bill Eckberg, Walnut, Ill. " " "
Dick Bergen- (Editor) at school, 115 Bassett Ct. Lexington.
Ed Hepp of Omaha, Neb. Member of long standing.
Art Friese, White Plains, N.Y. (would like the gang there
for 1964).

John Dyckman, Canfield, Ohio. An old timer in the AIPA.
Dave Pomeroy-Overland Park, Kan. (Been getting good Tropes.)
Bill Meers - Enjoys being a AIPA DXer.
Ron Hilding renews with pleasure- Address change also-
1115 -3rd Ave. Salt Lake City 3, Utah.

Address change for ... Peter Koch 691 E. 230 St Bronx, N.Y.
Don Ruland is now at P.O. Box 153
Apt. 15. Kenner, La.

We are in hopes of having an interesting article soon in regards to the current DX mileage calculating.

Well, here we are again with another month off lousy DX. This past summer can be remembered as one of the worst for skip. Speaking for myself, I only received one new station by Es this past summer (WAIQ2 on 6/29/62).

For the information of any new members and anyone who missed our column in the August bulletin, we have again included in this heading the list of the dozen states that are covered by this column. Also, I forgot to include my college address for the next nine months, except for holiday periods. Please send your reports for the November bulletin to the following address: 115 Bassett Court, Lexington, Ky. This will also apply for the December bulletin, etc. etc. etc. etc. etc.

If anyone is interested in writing to Bill Meers, I am enclosing his present address: William J. Meers; Institute for American Universities (IAU);
21, Rue Castou - de - Saporta, Aix-en-Provence; FRANCE

I'm sure that Bill would be happy to hear from his DXing friends, but bear in mind that his replies may be at long intervals due to his work schedule and other things that would obviously on anyone's mind who was visiting Europe. Bill said that he is going to try and travel over the continent somewhat, if possible.

A fine letter was received from Ray Foster, Jr., Monroe, La., a few days ago. He described his fascinating trip out to the World's Fair in Seattle and his sightseeing around the western part of the United States. Ray is now back at school at Northeast Louisiana State College.

I don't believe that I have ever stated in this column about what equipment I use for DXing. My receiver is a 1953 Admiral table model, the UHF converter is the first model that I bought out at the birth of UHF, and the two antennas are a double-bay conical and a hi-band Rainbow. The UHF antenna is a Walsee quadri-Bow. As you can see, this array isn't exactly the dream of a TV-DXer, but I have fun with it and that is the main thing; ISn't it???? Well, lots o DX to all. HI HI

Summer has ended, for all practical purposes--and with it has gone most of the TV-DX. It was off the wane last month, but this time has seen an even further slowdown in both the Es and tropes departments. There was a bit of Es and tropes, mostly in the Midwest. Es dates between August 20 and September 20: Aug. 25, 26, Sept. 1 & 6.

Dave Pomeroy has been in Lawrence, Kansas since early September, where he is attending the University of Kansas. He had his TV set with 4-bay UHF bow-tie in his room there before classes started, and saw the following regularly: KMBC-9 & KCMO-5 good; WDAF-4, WIBW-13, & KCSD-19 snowy; KFEQ-2 weak. His recent vacation trip took him to various places through the South, and he really had a good time. Dave also reports that KCSD-19 Kansas City resumes daytime programs Sept. 10. On the question whether WDIQ-2 can be counted as new or not--I looked it up, and others confirm it, too--it seems that WDIQ's xmtr has always been in Dozier, Alabama, even when it was WAIQ Andalusia--so in this case, it would not be counted as new, if it was seen before. If that is correct, Dave's total is 117.

Bill Hauser in Enid, Oklahoma has some Es and tropes to report. Aug. 25: Es, WGR-2 NT, KDKA-2 Pa. Aug. 26: Es, CHCT-2 Alta. Sept. 1: Es, XEZ-3 Queretaro, XEW-2 DF, XFWO-2 Guadalajara. Sept. 6: Es, WKTV-2 WSYR-3 NY, KDKA-2. Sept. 8: tropes, WFAA-8 KTWT-11 Tex. Sept. 10: tropes, KPSA-5 Ark. Sept. 11: tropes, KYTV-3 KRCG-13 KPLR-11 Mo, KGNC-4 KVII-7 KFDA-10 Tex, WLT-13 (new--630 mi) Bowling Green, Ky., WPSD-6 Ky. Sept. 12: tropes, KFVS-12 KFVI-2 KSD-5 Mo, WCIA-3 Ill, KETV-7 WOW-6 Neb. Sept. 18: tropes, KOSA-7 Tex. Bill's total, with one new, is now 279.

Eric Norberg of Carmel, California logged a new one by a relatively rare propagation at his location known to most of us as tropes--on Sept. 18: KVIQ-6 (300 mi) Tur-
ella, Calif., which raises his total to 47. He went back to Pomona College Sept. 22, where his address again is Box 298, Walker Hall, Pomona College, Claremont, Calif.

I saw Percy Cox in Visalia, California lately--and he said that there hasn't been any DX around there--other than occasional good tropes from northern California.

Your editor's log in Wasco, California also shows occasional above-normal ground wave from northern California, from the usual spots--San Francisco, Sacramento, Chico and Redding. Total remains 116. The call of ch. 77 Porterville, Calif., as noted last month, is K77BC.

I am back at Fresno State College, where I have been since Sept. 16. I hope to have reports from more of you for the next column--using the address listed above.

LAUGH CORNER: Has anyone ever seen a bird's nest in a television antenna? I have had the privilege. It seems that some UHF corner reflector antennas are ideally constructed for that purpose, although I don't think it's what the manufacturers had in mind, hi.... Around here, there are two or three such installations.. I don't know how reception is, but I suppose, to quote an old worn-out joke, it is "for the birds.".....
